About CervoMed

CervoMed is a clinical-stage company developing treatments for age-related brain disorders. Its lead drug candidate, neflamapimod, is an oral small molecule targeting critical disease processes underlying degenerative disorders of the brain by inhibiting a key enzyme involved in neuroinflammation and neurodegeneration. CervoMed's recently completed Phase 2b RewinD-LB trial evaluated neflamapimod in patients with DLB, enriched for those without AD co-pathology, and the Company announced alignment with the FDA on a potential registration path for neflamapimod in DLB in November 2025. Initiation of a Phase 3 trial in DLB is subject to the establishment of a partnership and/or additional financing. CervoMed also recently completed enrollment in its ongoing Phase 2a clinical trial evaluating neflamapimod in nvPPA, a subtype of frontotemporal disorders, from which interim biomarker data is anticipated in the early fourth quarter of 2026, and expects the first patient to be dosed with neflamapimod in the EXPERTS-ALS Phase 2a clinical trial in the fourth quarter of 2026.
